

Exploring Vedic Astrology: Starter Course (FAQ)

- Why is the course called Vedic Astrology. How is it different from conventional astrology?**

Vedic Astrology is unique because it is predictive and analyses all one's relationships in this life. The differences range from the origin, the calculation, the interpretation, the tools, to the depth and detail.

These are the main differences between the two astrological sciences. Vedic Astrology originates from India's ancient scriptures called the Vedas, hence the name Vedic.

In terms of calculation, Western astrology or common astrology is based on the tropical zodiac which is linked with the movement of the Sun and the calculation of the zodiac from the perspective of the people on earth. On the other hand, Vedic astrology is based on the sidereal zodiac, based on fixed stars and the true position of the planets in the celestial zodiac belt.
